

ASPIRE Annual Report

2022-23

Timeline of Education Model

Acknowledgements

ASPIRE Annual Report 2022-23 was prepared by a team led by Kartika Bhatia, Dipita Bhattacharya, and Saba Arzoo. Overall guidance was provided by Executive Director and Founder of ASPIRE, Dayaram; Odisha Program Head, Ravi Kumar; Jharkhand Program Head, Naresh; and Learning Program Leads, Upendra and Haldhar.

The core team comprised Sandipa Sinha, Satish Kumar, Swati Singh, and Tanya Sharma. Pintu Paul provided developmental guidance in editing the report. Special thanks to field teams in Odisha, Jharkhand, West Bengal, and Chhattisgarh who facilitated our access to data for preparing the report.

We gratefully acknowledge the support and generosity of our partners and funders - Tata Steel Foundation, HDFC, Tata Metaliks, and The Hans Foundation.

Introduction

All children have an inherent potential to learn and grow, but a myriad of circumstances, both inside and outside of schools, prevent them from realizing their true potential. The education crisis in India is a complex issue with profound consequences, particularly affecting children in rural and remote areas, especially those from low-income and marginalized communities. Insufficient resources, untrained teachers, outdated teaching methods, and inadequate infrastructure exacerbate this problem, leading to decreased school attendance, limited access to quality education, and diminished employment prospects. Consequently, this perpetuates the cycle of poverty and denies the next generation of children their fundamental right to education.

Many schools in rural and remote regions lack basic amenities such as toilets, clean drinking water, and electricity. This makes regular school attendance challenging for children, impeding their ability to learn effectively. The shortage of trained and qualified teachers, particularly in subjects like science, mathematics, and English, contributes to poor-quality education and disinterest among students. Moreover, outdated teaching methods and curricula prevalent in numerous schools hinder the development of critical thinking and creativity.

Cultural norms and practices create additional obstacles for girls in accessing education, making it arduous for them to attend school and complete their studies. Early marriage, domestic responsibilities, and safety concerns are primary reasons why girls drop out of school, perpetuating gender inequality and further limiting their opportunities for personal growth and social empowerment.

ASPIRE's Education Model emerged in response to this need for a comprehensive approach to overcoming barriers to quality learning. The initiative began in 2015 in the Eastern tribal region of India, in partnership with Tata Steel Foundation (TSF), through the launch of the 1000 Schools Project across six blocks in Odisha. This program covered 123 gram panchayats (GP), two municipalities, 2239 habitations, and 1129 government schools, benefiting approximately 1,54,815 children.

Over the past 8 years, we have diligently addressed the education crisis in India by strengthening the government-school system through our education interventions. Our areas of operation are densely populated with a tribal demographic, where access to education is limited, and the quality of education provided to tribal children is often inadequate. To address these issues, we have prioritized improving school governance, introducing new pedagogic practices, and empowering teachers and local communities. The primary focus is to enhance the quality of education and ensure equitable access for all children, regardless of their socio-economic background.

Our Education Model is specifically designed to provide universal access to quality education in remote and hard-to-reach areas and ensure the successful completion of secondary education for all children. We work closely with communities to identify and address cultural norms and practices that perpetuate gender inequality and prejudices. Through our interventions, we strive to increase girls' enrolment and completion rates.

In the financial year 2022-23, ASPIRE has achieved remarkable progress by expanding its reach to various gram panchayats and urban wards across seven districts in five states in India: Odisha, Jharkhand, West Bengal, Chhattisgarh, and Delhi. As a result, access to education has improved for a significant number of children from diverse backgrounds, positively transforming their lives. The program's extensive coverage of government schools and Anganwadi centers in these areas has further created a substantial impact on education in these underserved regions.

ଉପାଧ୍ୟକ୍ଷ

ଉପାଧ୍ୟକ୍ଷ

The Education Model has a 7-10 year implementation cycle to ensure that every child in the area completes high school. The model is implemented in close partnership with a range of stakeholders, including members from the Panchayati Raj Institutions (PRIs), School Management Committees (SMCs), Self- Help Groups (SHGs), Youth Groups, Child Rights Protection Forums (CRPFs), as well as state education department units such as the Cluster Resource Center (CRC), Block Resource Centre (BRC), and teachers' unions.

The Three Pillars Approach

The Education Model is based on a three-pillar approach that is informed by our decades of experience in education policy reform in India. We implement a range of interventions across three verticals - access, learning, and governance.

The **ACCESS** vertical is designed to ensure that every child has access to quality education. We identify out-of-school children through household surveys and link them to education through bridge courses and enrollment drives. We facilitate the creation of Child Rights Protection Forums (CRPFs) to help identify and bring out-of-school children back to school. To ensure regular school attendance, weekly headcounts of children are conducted and follow-up is done with SMC and CRPF members. We support all children in transitioning from primary to upper primary to secondary and maintain Village Education Registers (VERs) to track attendance and transition.

The **LEARNING** vertical focuses on addressing the basic learning deficit of children. We achieve this through our Learning Enrichment Program (LEP), demonstrating LEP pedagogy and classroom transactions in select public schools. The aim is to embed LEP pedagogy in public schools, starting from early grades, to eliminate the root causes of the deficit. We promote the use of digital technology to enhance classroom transactions and integrate local culture and knowledge into teaching methods and content. We develop learning habits and enhance the learning experience by setting up school libraries, undertaking pedagogic interventions at early-childhood centers, and incorporating innovations and best practices in teaching methods and content from across the world.

The **GOVERNANCE** vertical aims to build community ownership of the education agenda. We strengthen SMCs, PTAs, and anganwadi committees by training them in the management and governance of schools and pre-schools. We train and orient panchayats in their roles and responsibilities towards school management, the Right to Education framework, and child rights to enhance school performance and increase budgetary spending on education. Furthermore, we orient and train self-help groups and youth groups in child rights to raise awareness levels in the community.

Our Growth Story

Since its establishment in 2015, the Education Signature Program (ESP) has pursued a comprehensive path to achieve quality universal secondary education. This program offers a replicable, scalable, and sustainable Education Model enabling large-scale implementation.

STARTUP

In partnership with Tata Steel Foundation (TSF), ESP was launched in six blocks across three districts in Odisha, targeting educationally backward areas affected by mining. During the initial phase, significant effort was dedicated to mobilizing the community, engaging local stakeholders, and providing them with a comprehensive understanding of the project's objectives. We assessed the challenges faced by the community and their awareness of education rights. Our interventions included promoting school enrollment, facilitating the return of out-of-school children, and implementing bridging centers and learning enrichment programs.

REPLICATE

In 2016, we successfully replicated the Education Model in two blocks of Jharkhand's West Singhbhum district, with initial support from The Hans Foundation and TSF for three years, and subsequent funding solely from TSF. Similarly, in September 2020, we expanded to West Bengal's Kharagpur 1 block, covering Arjuni, Kalaikunda, Borkola, and Hariatara anchals. In November 2022, we extended our education approach to the Pondiuproda block in Chhattisgarh's Korba district, an aspirational district.

The replication involved adapting and applying the proven strategies, approaches, and practices that have shown positive results in the original model to the new setting. This included considering the new states' specific needs, challenges, and context while maintaining the core principles and goals of the education model. We conducted assessments and feasibility studies in Jharkhand, West Bengal, and Chattisgarh and engaged with local stakeholders and communities to understand the context and ensure the successful implementation of the model.

SCALE

Scaling up became our focus as the Education Model continued to grow in impact. In October 2019, the program encompassed the entire Keonjhar district, reaching 11 new blocks, highlighting the success of the initial Odisha blocks. The program's success led to further enlargement in December 2021, covering all 18 blocks in West Singhbhum district, and reaching more children in need of quality education. Subsequent expansions included the Hindol block in the Dhenkanal district in 2021 and the Odapada block in November 2022, funded by TSF. With support from The Hans Foundation, we expanded to the Korba District of Chattisgarh in December 2022.

Scaling up provided broader coverage and wider reach, offering increased opportunities for children and students to benefit from quality education. Throughout the process, we maintained the core principles and effectiveness of the original model, adapting it to suit the needs and context of new settings

Outcomes for Students

A. Ensuring Universal Access

The ACCESS component of the Education Model is designed to achieve universal access to quality education. It involves various strategies and interventions to ensure that every child attends school, actively participates, and completes their secondary education. Key initiatives include identifying out-of-school children, providing bridge courses, monitoring attendance and retention, and supporting students transitioning between school levels.

Identifying Out-of-School Children

Out-of-School (OoS) children, who are often overlooked in policy decisions, are identified through community contacts and household surveys. This includes migrants, long dropouts, short dropouts, and never enrolled children. By obtaining accurate data, we can effectively target these excluded children and provide them with educational opportunities.

Direct Enrolment

According to the Right to Education Act (2009), children between the ages of 6 and 14 have the right to free and compulsory education. Children aged 6 to 8 who have never been enrolled are placed in age-appropriate classes in the nearest government school. **Table 01** highlights that 13,061 children were directly enrolled in Anganwadi centers and government schools last year.

Non-Residential Bridging Course (NRBC) Centers

NRBC centers cater to underprivileged children who have temporarily dropped out of school. These centers are strategically located in isolated areas, such as deep forests or difficult terrains. NRBC teachers are recruited from the same community to ensure trust and familiarity, thereby facilitating in local languages. Engaging activities, including dance, drama, and games, help children bridge learning gaps. Once they reach the appropriate learning level, they seamlessly integrate into government residential schools for continued education. **Table 02** shows that during FY 22-23, 12,939 children took remedial classes in 437 NRBC centers last year. 8,008 were mainstreamed to government schools. The rest of the children continued in the NRBCs.

Residential Bridge Course (RBC) Centers

RBC centers cater to underprivileged children between the ages of 9 and 14 who have never attended school, are long dropouts, orphans, and semi-orphans. These centers provide 24-hour residential care, creating a safe and nurturing environment for learning. Children engage in various activities, receive education on nutrition and hygiene, and develop relationships with teachers and peers. After completing the bridge course, they are mainstreamed into nearby residential or regular government schools. 42 RBCs were operational during FY 22-23, sheltering 4,550 children, opportunity for quality learning, and a dignified future. 909 children shifted to government schools and ashramshalas from the RBCs last year (See **Table 03**).

Village Education Register (VER)

The Village Education Register is a monitoring tool used to track the status of each child aged 0-18 in every Gram Panchayat. Our staff, in coordination with various stakeholders, keeps the registers updated. It tracks attendance, and retention, and ensures zero dropouts throughout the school cycle.

Transition Across Levels

Transition data plays a crucial role in monitoring and supporting students' academic journey. It allows us to track their progress, identify potential dropouts, and gain insight into the challenges they face during transition periods. By identifying problematic areas, we can effectively communicate with the administration, enhancing the effectiveness of our program and interventions. **Table 04** shows that almost 100% of children are transitioning successfully across grades. In FY 22-23, in Phase I blocks, 11,503 children in AWCs were eligible for grade 1 (meaning they were around age 6) and 100% of these children transitioned to primary. During the same year, 13,138 children in grade V were ready for the transition to upper primary and 99.95% of these children transitioned.

Child Labour Free Zone (CLFZ)

The comprehensive set of ACCESS interventions aims to establish child labour free zones, ensuring that all children between the ages of 6 and 14 are enrolled in schools, government hostels, and RBC/NRBC centers, and maintain an average school attendance of around 85% over the last three months. Once the data is verified, the community convenes for a meeting where they officially declare the habitation/panchayat/block as a Child Labour Free Zone. This declaration signifies the community's commitment to continuously monitor and track children's attendance, thus sustaining the CLFZ status.

According to the data presented in [Table 05](#), the Phase I and II blocks have successfully achieved CLFZ status, while the ongoing efforts in Phase III's eleven blocks in Keonjhar district and Phase IV's Hindol block are progressing towards becoming CLFZs in the upcoming fall of 2023. These developments highlight the significant strides made in eliminating child labour and ensuring access to education in these areas.

B. Ensuring Quality Learning

The LEARNING vertical is dedicated to ensuring grade-appropriate learning for students by implementing various pedagogic interventions. These initiatives aim to enhance learning outcomes, bridge foundational gaps, and improve teaching methodologies.

Learning Enrichment Program (LEP)

The Learning Enrichment Program focuses on enhancing the learning environment in government schools. It aims to revamp teaching approaches in Language, Math, Science, and Social Sciences by integrating innovations into the existing school system. LEP emphasizes six key aspects of learning: planning, teacher learning material (TLM), pupil organization, classroom culture, classroom transaction, and assessment. By employing various learning strategies, such as reading, writing, speaking, and comprehension exercises, the LEP aims to improve language and literacy skills, enhance imagination, and deepen subject knowledge. Moreover, teachers actively participate in designing their own TLM to align with the socio-cultural context of the classroom. 152 LEP centers were operational last year, reaching out to 5,523 children (see [Table 06](#)).

Foundational Literacy and Numeracy (FLN)

The FLN program, introduced in response to the NIPUN Bharat initiative, focuses on foundational literacy and numeracy for children in grades 1 to 3. This program specifically targets first-generation learners who lack support at home. These students often face language barriers and are taught by teachers who may be overburdened and lack resources and training.

To address these challenges, we have implemented a unique approach. We train locally educated volunteers who work alongside primary grade government teachers to deliver the FLN curriculum in schools. Each volunteer dedicates 2-3 hours every day to support the teachers and provide the necessary assistance. In addition, we ensure that the schools have access to appropriate teaching and learning resources, enhancing the quality of education provided.

Furthermore, we recognize that there is a significant language gap between the language spoken at home and the language used in the school setting. This poses a particular challenge for children from indigenous backgrounds, making it difficult for them to fully engage in the classroom. To tackle this issue, we have collaborated with the EkStep Foundation to develop a bridge language inventory of local and tribal languages. This inventory is accessible through the Government of India's Diksha app, enabling students to bridge the language gap and actively participate in their education.

Impact of the FLN

The FLN coverage and impact are presented in **Table 07**.

- 2,49,430 grade I-V children improved their foundational learning
- 3,362 government school teachers trained
- 3,594 volunteers engaged in teaching and supporting learning
- Synergic bond with govt. teachers and other functionaries
- Joint planning and training with the block/district education departments
- Overwhelming support from parents and the community
- High energy and commitment among volunteers
- Increased attendance in schools and punctuality of children and govt. teachers

FLN Volunteer Profile

A digital survey of FLN volunteers is currently ongoing. Out of the 3,399 surveyed so far -

- 79% are female
- 60% are ST, 31% OBC, 7% SC, and the rest GENERAL category
- 43% are graduates and above
- 15% have been a direct beneficiary in the Education Signature Program
- 93% have decided to continue volunteering with us for FY23-24

20-Pilot School Project

The 20 Pilot School Project was launched in collaboration between the University of Turku, the Tata Steel Foundation, and ASPIRE. Its implementation took place in November 2022, focusing on two blocks in Odisha: Danagadi and Sukinda, each comprising ten schools and a total of 1,685 children. The primary objective of this initiative is to integrate Finnish pedagogies into the science and math curricula of govt middle schools. (See Table 08)

This project emphasizes both "In-Class Learning" and "Out-of-Class Learning" approaches. In the "In-Class Learning" environment, the classroom atmosphere is designed to allocate 20% of the time to instructors and 80% to students. On the other hand, "Out-of-Class Learning" focuses on utilizing children's time outside of the traditional classroom structure. This includes encouraging interactions with parents, observation, community engagement, and other activities that facilitate learning beyond the confines of the school setting.

The project focuses on math and science for Grades 6 to 8, providing 2 hours per day with one hour before and after regular school hours. It breaks the misconception of math lacking imagination through practical, experiment-based content. Digital resources are integrated to enhance the learning experience, while a child-centric, activity-based approach encourages active student engagement. By incorporating guidance from the Finnish education system, the project aims to make learning tasks more innovative and culturally relevant.

Ms. Sari-Isokyto Sinjoi and Ms. Mari Hanski Mari facilitated the online professional development of teachers for the 20 Pilot School Project. Ms. Sinjoi is a math and science teacher at the Teacher Training School in Rauma, Department of Teacher Education, while Ms. Mari is a math and physics teacher at the Teacher Training School in Turku. Their expertise and guidance provide valuable professional development opportunities for teachers, enhancing their teaching practices and effectively implementing the project's objectives.

Out-of-Class Learning:

Lockdown Learning

The Lockdown Learning initiative was launched in March 2020 as a response to the pandemic, initially targeting 30,000 children who were already enrolled in our LEP. However, in January 2021, after nine months of school closures, we expanded the program to include non-LEP children as well. This expansion brought in approximately 100,000 primary (grades 3 to 5) and upper primary (grades 6 to 8) students, forming what we called the Lockdown Learning Expansion (LLX). Throughout the 2022-23 academic year, our teaching staff provided support to these children at 857 centers, both before and after school.

The Lockdown Learning initiative has yielded several positive outcomes:

- Children have become self-directed learners, taking charge of their learning.
- Parents and families have become actively involved in their children's studies for the first time.
- There has been a significant improvement in both the quantity and quality of reading and writing skills.
- Children have acquired new skills, such as time management, independence, and improved proficiency in information and communication technology (ICT) and communication skills.

Lockdown Learning: Reach and Impact

**FY 22-23: 857 LL
centres operational**

**26,117 children
benefitted**

**Regions covered: Odisha (19
blocks), Jharkhand (2 blocks),
Kharagpur-West Bengal (1
block)**

Class 10th Exam Support

The 10th-grade board exam marks a crucial milestone in students' academic journey. Our assistance includes distributing entrance exam booklets and organizing daily tuition sessions lasting 2-3 hours, led by LEP teachers and volunteers. These sessions, consisting of mock tests and tutorials, span 3-4 months.

To support 10th-grade students who face financial constraints and cannot afford tuition, our CERC facilitators offer academic guidance. Additionally, students can leverage the CERC's internet facilities to access educational content via Google search engines and YouTube, enriching their learning experience.

In FY 22-23,

- 929 children from Odisha, who have passed through our various interventions (RBC/NRBC/LEP) appeared for the 10th board exam. Barring 8 children, all passed.
- 806 children from ESP Phase II Jharkhand blocks were supported for the 10th board exam. The results are not out yet.

Sabita Juanga, the first student from the remote village of Baunru in Harichandanpur block in Odisha, has successfully completed her high school education. Baunru village gained prominence after Umesh Anand's article, titled "School in the Sky," shed light on the area's inaccessibility and underdeveloped conditions in the Civil Society Magazine. Sabita, a participant in our RBC program, achieved remarkable success this year by securing an impressive 72% in her metric examination.

Outcomes for Schools and Anganwadis

A. ICDS Support

The Government of India's ICDS program provides services for children under six years of age, as well as adolescent girls, pregnant women, and lactating mothers. It recognizes the interconnected health and nutritional needs of a child and their mother, with the goal of ensuring child survival and development through various services. We collaborate with the ICDS structure to support their six services, which include nutrition, education, health, and referral services, among others, through various interventions.

Our interventions to improve the delivery of services and benefits under the ICDS program includes:

- Run an awareness campaign among ICDS beneficiaries to ensure transparency and accountability.
- Conduct awareness campaigns with community members regarding the importance of a nutritious diet, immunisation, and access to ICDS services for children, pregnant and lactating women.
- Facilitate the formation of mothers' and monitoring committees in places where they are non-existent, followed by meetings and orientations to make them aware of their roles and responsibilities.
- Provide orientations and training to anganwadi workers for better program implementation.
- Facilitate the preparation of annual anganwadi development plans, which are submitted to gram panchayats.

Pre-primary education

Pre-primary education provided at anganwadi centers plays a crucial role in the early years of a child's development. It is vital for the child's physical, mental, and emotional growth and prepares them for formal schooling, preventing dropouts and repetition in later stages. Our approach towards pre-primary education at anganwadi centers includes the following:

- Ensure all children between 3-5 years of age join anganwadi centers and subsequently transition to schools.
- Capacity-building programs for anganwadi workers on early-childhood teaching and development.
- Provide teaching-learning materials to anganwadi centers to enhance the effectiveness of the teaching-learning process.

B. Government Teacher Training

Foundational literacy and numeracy are the building blocks for all other learning, knowledge, and higher-order skills that children attain through education. Classroom practices play a critical role in developing these skills.

We volunteer to help track and bring out-of-school children to school and provide hands-on support to teachers in their teaching-learning process. This includes equipping teachers with teaching-learning materials and offering guidance in the planning of engaging activities through regular meetings. The results have been promising, as teachers exhibit a keen interest in embracing innovative classroom practices and leveraging local resources to create impactful teaching-learning materials. Empowered by their newfound knowledge and skills, these teachers have even assumed leadership roles, spearheading the training of their fellow educators.

Table 09 presents the training, meetings, and orientations held with government teachers in FY 22-23. 6,982 male teachers and 6,082 female teachers received training last year.

C. Collaborating with Local Self-Government Stakeholders

At ASPIRE, our vision for transforming the education landscape extends beyond the confines of classrooms. To bring about meaningful and lasting change, we actively engage with key stakeholders in local self-governance. This includes District Education Officers, Block Education Officers, Panchayati Raj institutions, gram panchayats, panchayat samitis, Zila Parishad, and others. Through these partnerships, we are able to drive change in children's education, safeguard child rights, address challenges such as child marriage and child labor, and track out-of-school children.

Understanding the dynamics of the local governance system is pivotal to our approach. We foster strong relationships with influential figures like Munda-Mankis in Jharkhand, establishing a solid foundation for collaboration on development challenges. Additionally, we provide training opportunities and facilitate meetings and interactions with gram panchayat staff, enabling the preparation of the Gram Panchayat Development Plan (GPDP).

By aligning our interventions with the local governance framework, we empower stakeholders at various levels, amplifying their impact and fostering sustainable development.

A total of 1,560 trainings, meetings, and orientations were held with local self-government stakeholders during FY 22-23 ([See Table 10](#)).

Outcomes for Community

A. Child Rights Protection Forum (CRPF)

The Child Rights Protection Forum, also known locally as Shishu Adhikar Suraksha Samiti (SASS), is a dedicated volunteer team focused on safeguarding children's welfare. Village-based CRPF committees, consisting of 10 to 20 members, collaborate to make decisions in monthly meetings. The committees, with equal representation of men and women, are formed through nominations and voting. CRPF conducts household visits, tracks child attendance and labor, and supports children's education by referring them to ASPIRE's programs. 33,984 individuals participated in 2,414 meetings, orientations, and training last year (see Table 11).

B. Strengthening Self-Help Groups (SHG)

Our efforts focus on enhancing SHG capacity through awareness meetings on critical issues like child marriage, child labor, health, nutrition, women's equality, and domestic violence. SHGs receive support through our Community Education Resource Centers, including training on agriculture, mushroom cultivation, and fisheries. SHG women also contribute to product creation and assist in updating Village Education Registers (VERs) to track school dropouts and support Anganwadi staff.

AA total of 4,688 trainings, meetings, and orientations were held with SHGs in FY 22-23 (see Table 12).

C. Empowering Rural Communities through Community Education Resource Centers (CERCs)

Community Education Resource Centers serve as vital local institutions that are owned and managed by the community itself, addressing their educational, cultural, and critical information needs in the digital era. These centers play a pivotal role in bridging the digital divide and empowering remote rural communities by facilitating access to education and digital resources.

As part of our flagship Education Signature Program, 76 CERCs are currently operational in Odisha and Jharkhand. These centers are registered entities with dedicated community-owned bank accounts, ensuring financial transparency and sustainability. Equipped with computers, internet connectivity, printers, projectors, libraries, audio-visual content, arts and crafts materials, STEM learning resources, and screening capabilities for socially relevant films, talks, and seminars, the CERCs provide a wide range of resources to the communities they serve. The availability of such facilities enables access to digital empowerment and education. Communities can utilize the centers for online admissions, printing, photocopying, ticket booking, accessing certificates and records, and even job applications.

They are integral components of the long-term sustainability and exit plan of the Education Signature Program. After the completion of the project, these centers will continue to serve as valuable resources for gram panchayats, youth groups, and self-help groups. These institutions will utilize the CERCs to update their knowledge and access information, ensuring the enduring impact of the program.

D. Empowering Youth Groups

Youth groups play a pivotal role in effecting change within their communities. We organize meetings and orientations for adolescent girls, covering essential topics such as health, hygiene, child rights, and career counseling. Computer training, including STEM learning and digital literacy, is provided at our 62 Community Education Resource Centers (CERCs). The youth groups actively participate in helping us organize school-related activities and assist in organizing events and camps. 2,512 meetings, orientations, and trainings were held with youth groups last year, where 22,031 males and 12,952 females participated (see [Table 13](#)).

YOUTH EMPOWERMENT PROGRAMS

- **Conducted 135 orientations and training sessions in 7 projects**

- **Topics covered: Health, Hygiene, Nutrition, Child Rights, Child Marriage, Child Labour, Career Counselling, and Development**

- **Total participation: 5356 youths. 2292 males and 3064 females.**

F. Adolescent Development

Investment in adolescent development in rural areas is of utmost importance for several compelling reasons. Firstly, it empowers adolescents by equipping them with essential knowledge, skills, and confidence to navigate life's challenges, make informed decisions, and realize their full potential. Secondly, it catalyzes breaking the cycle of poverty and contributes to the overall socio-economic development of rural communities, fostering responsible and engaged citizenship.

Our comprehensive programs cater to the needs of both adolescent boys and girls, encompassing a diverse range of awareness initiatives on critical topics such as health, hygiene, nutrition, mental well-being, life skills, leadership, gender equality, the Indian constitution, citizenship, and more. We also conduct specialized sessions exclusively for adolescent girls, providing them with a safe and supportive environment to address pressing issues like child marriage, child labor, and the significance of education for girls. Moreover, recognizing the importance of digital literacy in today's world, we offer valuable training in software applications like CorelDraw, Excel, Tally, and others through our Community Education Resource Centers.

During the previous year, a total of 1,257 orientation workshops were conducted, engaging 66,921 adolescent girls (see [Table 14](#)). These workshops aimed to prepare young individuals to navigate the complexities of contemporary challenges such as gender and social inequality, economic and social transformations, climate change, and unemployment.

Continued efforts are needed to expand these interventions to include boys while incorporating training that further enhances skills, raises awareness, and empowers adolescents to exercise their voices and agency.

Stories of Success

Lost in the Jungle, Found in Hope: The Inspiring Journey of Risa Munda

In the heart of Joda block, nestled in Keonjhar District, Odisha, resides a resilient 14-year-old girl named Risa Munda. Since 2018, she has sought refuge at the Girl's RBC alongside her 8-year-old sister. Risa's father, a former worker in the mining sector, and her mother, a resourceful homemaker who occasionally sells wood from the nearby jungle, have always strived to provide for their family's daily needs. However, Risa encountered difficulties in her studies, prompting her father to send her to her paternal grandmother's home in hopes of fostering academic focus.

Yet, confined by the limitations and restrictions imposed there, Risa yearned for freedom. Driven by an unwavering spirit, one fateful day when her grandmother was absent, she embarked on a daring escape. Little did she know that her venture into the wilderness would lead her to a perilous journey lasting six harrowing days. With sheer determination, Risa sustained herself on wild fruits while enduring the thirst that ravaged her body. Fearful of jackals and pigs, she sought refuge on the precarious branches of trees, her only solace. On the sixth day, a faint sound reached her ears - the distant rumble of a passing train. This serendipitous encounter guided her towards a railway station, where compassionate strangers provided her with the assistance she desperately needed. Without a ticket, she surreptitiously boarded the train, hiding in the bathroom to evade the watchful eye of the ticket collector. Miraculously, amidst the bustling journey, a familiar face crossed paths with Risa. A kind lady whom she knew recognized her and became her guiding light, ensuring her safe return to the village she called home.

However, the trials that Risa's family faced extended beyond her wilderness ordeal. Her father, wrongfully accused of a heinous crime alongside his friends, had been unjustly imprisoned for five long years. Despite her mother's valiant efforts to secure his release, their savings proved insufficient to overturn the false allegations that had shattered their lives. Left with no other option, Risa's mother resorted to working as a domestic help in neighboring households, weathering the abrupt upheaval that had befallen their family. It was during the stringent lockdown measures that the vigilant ASPIRE team discovered Risa toiling as a child laborer. Recognizing her dire circumstances, they swiftly intervened, providing her a lifeline by ushering her into the loving embrace of the RBC. Within its nurturing environment, Risa found solace and a renewed sense of purpose.

Beyond her academic pursuits, Risa's spirit thrives in the realm of sports. She finds joy in playing volleyball and cricket, nurturing dreams that reach far beyond the confines of her present reality. Her youthful aspirations are imbued with the desire to one day experience the exhilaration of riding a bike. However, Risa's aspirations extend beyond personal ambitions. Her unwavering conviction lies in a heartfelt motivation - to become a police officer. With this noble calling, she seeks to protect innocent individuals from the clutches of unjust punishment, ensuring fairness and justice prevail in her community.

In the face of adversity, Risa Munda embodies resilience and the unyielding spirit of hope. Her remarkable journey from being lost in the unforgiving jungle to discovering her path towards a brighter future is a testament to the indomitable human spirit. Through her unwavering determination, Risa serves as an inspiration to us all, reminding us that within the depths of hardship, hope can be found and dreams can be realized.

From Adversity to Ambition: Vishnu's Journey at RBC Telkoi Block

In the face of immense hardship, 12-year-old Vishnu Pradhan, a member of the Bhuiyan tribe, has shown remarkable resilience. Bereaved of his mother as an infant and losing his father to a tragic thunderstorm while in second grade, Vishnu's path seemed destined for struggle. Forced to drop out of school, he sought refuge with his paternal uncle, enduring grueling days working in the fields and subsisting on meager meals.

However, a turning point arrived when GPCM Papuna Mahto, during a field survey visit, discovered Vishnu's plight. Convincing his elder sister to enroll him in the RBC in Telkoi block, Mahto extended a lifeline that allowed Vishnu to resume his education.

Since joining RBC in February 2022, Vishnu's life has undergone a remarkable transformation. Freed from the burdens of household chores and laborious work, he now thrives in an environment that nourishes his academic pursuits. Enjoying nourishing meals, Vishnu's spirits have been uplifted, and he has discovered a passion for cricket. Alongside his studies, he cherishes treats like biscuits, chocolates, and soan papdi. Driven by a profound sense of empathy, Vishnu harbors aspirations of becoming a doctor, aiming to bring medical care to those in need, particularly the underprivileged. His determination is further strengthened by a touching incident from his childhood, where his elder sister toiled relentlessly to gather funds for his medical treatment, epitomizing the unbreakable bond within his family.

Now, Vishnu embarks on a path towards a brighter future, armed with an unwavering resolve to realize his dreams and make a positive impact on society. His journey stands as a testament to the triumph of the human spirit in the face of adversity, inspiring us all with his unwavering ambition.

Pangila Ho: Overcoming Challenges to Empower Children in Odisha

In the remote and challenging terrain of Odisha, Pangila Ho, a determined 25-year-old FLN volunteer, has emerged as a beacon of hope for children in her community. Despite facing numerous obstacles, her unwavering commitment to education and her community has made her a true inspiration.

Pangila's journey began with a fervent desire to work for the betterment of children, even though she had to discontinue her studies due to various constraints. The FLN program began with three days of rigorous training. Hailing from the Khajuribani Village, a particularly isolated region, Pangila embarked on a challenging expedition to reach the training center, located 45 kilometers away in Kumada Village, Dhakota Cluster, Anandpur Block. The arduous journey involved navigating treacherous roads and enduring poor connectivity. Undeterred by these difficulties, Pangila, accompanied by her ten-month-old daughter, embarked on a boat to cross two gram panchayats, Kolimati and Ghurikut, to attend the training. Her determination and resilience knew no bounds.

Once equipped with the necessary skills, Pangila recognized the critical need for education in her community. Conducting engaging morning sessions for 18 children from grades 1 to 5, Pangila incorporated local language songs, rhymes, and interactive activities to captivate their interest. Her efforts received recognition, not only from the children but also from her family, friends, and the entire village.

Despite the formidable challenges that she and her fellow volunteers face, Pangila's unwavering dedication highlights the indomitable spirit of those committed to providing education to every child.

Resilience Unleashed: Chinmayee's Triumph Over Adversity

In the depths of despair and against all odds, Chinmayee Mahanta, a teacher at Hatiyanasa Girls RBC in Jhumpura Block, emerged as a symbol of courage and resilience. Her journey from darkness to light showcases the indomitable spirit of a woman determined to break free from the shackles of a traumatic past.

Born and raised in a village that prided itself on education and access to various amenities, Chinmayee faced unforeseen challenges. While pursuing her B.Ed in 2014, a proposal of marriage from her mother's relative disrupted her path. Despite her father's initial refusal, the persistent relative continued to push the proposal. Eventually, her parents, swayed by promises that she could continue her studies after marriage, agreed.

However, the marriage quickly unraveled, revealing a nightmarish reality. Chinmayee's father-in-law demanded dowry and harbored resentment towards her family. Her husband, a mechanical engineer, revealed his infidelity shortly after their wedding. After enduring physical abuse and a toxic environment for over three years, she finally confided in her maternal aunt, who alerted her parents. Unfortunately, their advice was to tolerate the situation.

The challenges Chinmayee faced were insurmountable. Forced to work on her in-laws' farm and deprived of basic necessities, she was falsely accused of infidelity and subjected to a horrifying act of violence. Her right hand was burned with scalding wood when she refused to accept baseless accusations. Desperate and fearing for her life, she sought refuge with her father-in-law's brother, who revealed a sinister plot orchestrated by her in-laws.

With the help of her father, Chinmayee escaped her tormentors and found solace within the walls of her own home. A turning point arrived when the former sarpanch of her village intervened, securing her a teaching position at Hatiyanasa Girls RBC. Initially hesitant, she soon discovered her passion for teaching and forged meaningful connections with her fellow educators. Through her work, Chinmayee regained the respect of her relatives, who had once turned their backs on her.

Today, Chinmayee is a beacon of hope, dedicating herself to empowering young girls and rewriting her own narrative. No longer burdened by the shadows of her past, she has found purpose and happiness in her work. Her unwavering determination and newfound strength illuminate the path towards a brighter future, leaving behind the haunting echoes of a life she no longer wishes to reclaim.
